*The Occupational Health and Safety Act provides for the safety, health and welfare of workers and all persons lawfully present at work places. The working conditions for miners pose a huge risk to their health and safety. Helmets, boots, reflector jackets and gloves, among others should be provided to avoid contamination by the minerals.*

**For further information on health and safety, please contact Health and Safety officers at the following institutions:**

- 1. State Department for Mining**
- 2. National Environment Management Authority (NEMA)**
